

COVID-19 HEALTH GUIDELINES FOR GIRL SCOUT MEETINGS

Girl Scouts are known for **being prepared**, leaving a place **better than they find it**, and **stepping up** in emergency situations. Girl Scouts understand that COVID-19 is an extremely contagious virus that spreads easily in the community and are taking extra precautions to limit exposure for girls, volunteers, families, and our partners providing public meeting spaces.

- Group size is no more than 16 (12 girls and 2-4 adults)
- Families do a quick health check before leaving home and don't attend if not feeling well
- Six-foot social distancing is maintained
- Everyone must properly wear a face covering over their nose and mouth
- Participants wash their hands when they arrive, before they eat, after they use the restroom, after they cough or sneeze, and before they leave the meeting
- First Aid kits include:
 - Extra hand sanitizer that contains at least 60% alcohol and does NOT contain methanol
 - Extra masks
 - Gloves
- Each participant has her own supplies (crayons, markers, staplers, etc.) so they are not shared
- Each participant brings her own snack from home or a pre-packaged snack, if provided
- Disinfectant wipes or spray are used to clean high-touch objects and surfaces
 - Table tops, chairs, counters, door handles, light switches, etc. are wiped on arrival and prior to leaving the meeting location
