Homemade Crystals

Complete the three steps to earn your Kitchen Chemistry patch.

1. **Gather your materials:** You will need the following items:
   - Glass jar or cup
   - Stick (wooden dowel or popsicle stick)
   - Borax
   - Spoon
   - Hot water
   - Pipe cleaners

   You can make crystals with other different materials. Check out this [link](#) for more ways to grow crystals.

2. **Grow your crystals:** Watch the attached video to learn how to make your own crystals.

3. **Display your crystals:** Show off your crystals to your family. Display yours in the window or even make it an ornament.
