

# Drawing

Complete the five steps to earn your Drawing Badge.

1. **Experiment with different materials:** You can create a picture in many different ways. Draw three pictures of the same item using different materials such as: black pen, pencil, charcoal, colored pencils, crayons, or pastels. What material do you like using the best?
2. **Learn to add shading:** draw a landscape or still life and practice adding shadows. Shadows give depth to a drawing. You can use create shadows by smudging your drawing, using cross hatching, or even just putting different amount of pressure on your pencil.
3. **Get Some Perspective:** Check out the video to see how to draw with perspective.
4. **Use Your Imagination like a Graphic Artist:** Get creative and come up with your own cartoon character. What do they look like? Think of every detail from head to toe and draw it out.
5. **Make your Masterpiece – and Show it Off:** What was your favorite way to draw? What was your favorite material to use? Put together your new skills and create your own work of art. Then host an art show, showing off all your works of art to your family.
