

# Outdoor Art Master

Complete the five steps to earn your Outdoor Art Master Badge.

1. **Explore Outdoor Art:** Use the video for tips and tricks for creating indoor and outdoor art.
2. **Make something:** Using materials found around your house see if you can make a kite. Be sure to think about what will be easy to fly, catch the wind, and something to hold on to.
3. **Find music in nature:** Design a soundtrack for others to listen to while outside. Think of your place to walk or hike and what songs would go well with that walk or hike. Create the soundtrack and share it with others.
4. **Be a Nature Photographer:** Explore new perspectives and take pictures of the world around you from different locations. Photograph a tree as if you were laying under it. Take a picture of the grass as if you were an ant, or a flower as if you were a butterfly. Consider sharing these photos to inspire others to explore nature.
5. **Design with Nature:** Take a look at your yard, neighborhood, or local park. Imagine you have been tasked to design something for that space. It can be anything, a sculpture for the park, a maze for kids to explore, a garden, a shelter to keep you safe from the elements, or even a new patio with outdoor furniture. Sketch out your ideas or make a landscape plan for your design.
